The User Stories

From three different perspectives

1. Normal perspective

   (a) As a user I would like to see all the topics he/she is interested in.

   (b) As a user I would like to have the feature like notifying me that I havent been talk to someone for a very long time, do I want to send a greeting to other ones.
   And I can click one button to send a hello or whatever I write as a template. Hey, its been a long time we talk last time. I keep thinking about you, do you want to have a cup of coffee maybe?

   (c) As a user I dont want to use the app too much every day. So I would like to just have a chance to send a friend request to one girl. I should focus on the one I may be really interested in not send a lot friends request.

   (d) As a user I would like to filter others based the their age

   (e) As a user I would like to see all the comments made by that person
   It represent the people, everything you have commented before just represents you.

   (f) As a user I would like to see all the topics he/she is interested in.

2. From the boy's perspective

   (a) As a college student I would like to see all the girls in the database at the same school as me.
   For example, When I choose the same school as mine, all the girls who choose to give their school name should be seen to me.

(b) As a college student I dont want other people feel like I am annoying, so they should block me whenever they want.

Sometimes I am too rude or the girl just dont want to talk to me anymore, it should be a feature like blocking and no notification for me for the sake of my respect

(c) As a user I would like to filter girls based the their major

(d) As a user I would like to filter girls based the their club

    i. swimming club

    ii. reading club

3. From girl's perspective

(a) As a girl, I want to a boy who can talk on the topics what interests me.

(b) I love adventurous trips; can I find a man who can enjoy these trips with me.

(c) Before meeting a person, I would prefer to chat with them so that I can find out more similarities between us.

(d) As a girl, I want to meet a boy who is from my university so it would be easier to meet him.

(e) As a user, I can block the person if they annoy me.
